Volume 9
1970

Number One

On-line inquiry under a small-system operating system 2
K. Darga

Trajectory control programs in support of Apollo missions 12
D. R. Quarles

A structure for real-time Stenotype transcription 24
J. W. Newitt and A. Odarchenko

Single-server queuing processes in computing systems 36
W. Chang

Number Two

Evaluation techniques for storage hierarchies 78
R. L. Mattson, J. Gecsei, D. R. Slutz, and I. L. Traiger

A model of floating buffering 118
L. J. Woodrum

Interactive Saturn flight program simulator 145
J. H. Jacobs and T. J. Dillon

Number Three

Code-generation technique for large-language compilers 166
M. Elson and S. T. Rake

A heuristic approach to task dispatching 189
K. D. Ryder

A virtual machine time-sharing system 199
R. A. Meyer and L. H. Seawright

Interactive aeronautical charting 219
J. H. Luetje

Number Four

Automatic generation of test cases 242
K. V. Hanford

The authorization problem in shared files 258
T. D. Friedman

Compiler assignment of data items to registers 281
W. H. E. Day

Five-year author index

Five-year subject index

APPLICATIONS AND EXPERIMENTS

Automatic dictionary and machine-readable text — Galli, **6,** 3, 192
Interactive graphics in data processing
- Algorithm to generate spline-like curves — Ahuja, **7,** 3/4, 206
- Modeling in three dimensions — Appel, **7,** 3/4, 310
- Crystal structure analysis — Okaya, **7,** 3/4, 322
- Retrieval of geometric information — Jacobsen, **7,** 3/4, 331
- Analysis and display of physics data — McGee, **7,** 3/4, 342
- Neutron cross-section evaluation — Creasy, **7,** 3/4, 355
- Cam design on a graphics console — Lafuente, **7,** 3/4, 365
- Implementation and usage — Day, **7,** 3/4, 373

Algorithm for empty freight car allocation — White, **8,** 2, 147
Trajectory control programs — Quarles, **9,** 1, 12
Real-time Stenotype transcription — Newitt, **9,** 1, 24
Interactive flight program simulator — Jacobs, **9,** 2, 145
Interactive aeronautical charting — Luetje, **9,** 3, 219

COMPILERS AND ASSEMBLERS

Macro language design for System/360 — Freeman, **5,** 2, 62
Code-generation for large-language compilers — Elson, **9,** 3, 167
Compiler assignment of data items to registers — Day, **9,** 4, 281

COMPUTER SYSTEMS AND ANALYSIS

Design characteristics of the 9020 system — Blakeney, **6,** 2, 80
Microprogram control in System/360 — Tucker, **6,** 4, 222
Structural aspects of the System/360 Model 85
- General organization — Conti, **7,** 1, 2
- The cache — Liptay, **7,** 1, 15
- Extension to floating-point architecture — Padegs, **7,** 1, 22

Hierarchical control programs — Keefe, **7,** 2, 123
Auxiliary processing system for array calculations — Ruggiero, **8,** 2, 118

DATA STRUCTURES

Principles of interactive systems — Johnson, **7,** 3/4, 147
A multilevel modeling structure — Baskin, **7,** 3/4, 218
Associative data structures for PL/1 — Symonds, **7,** 3/4, 229
Implementing interactive applications — Chen, **7,** 3/4, 257
Hierarchical structure for data management — Henry, **8,** 1, 2
Real-time Stenotype transcription — Newitt, **9,** 1, 24
Authorization in shared files — Friedman, **9,** 4, 258

GRAPHICS IN DATA PROCESSING

Principles of interactive systems — Johnson, **7,** 3/4, 147
Aspects of display technology — Appel, **7,** 3/4, 176
Geometry for construction and display — Ahuja, **7,** 3/4, 188
An algorithm for generating spline-like curves — Ahuja, **7,** 3/4, 206
A multilevel modeling structure — Baskin, **7,** 3/4, 218
Auxiliary-storage associative data structure for PL/1 — Symonds, **7,** 3/4, 229
A subroutine package for FORTRAN — Rully, **7,** 3/4, 248
System for implementing interactive applications — Chen, **7,** 3/4, 257
Conversational job control — Brown, **7,** 3/4, 271
A conversational display capability — Gagliano, **7,** 3/4, 281
A language for three-dimensional geometry — Comba, **7,** 3/4, 292
Modeling in three dimensions — Appel, **7,** 3/4, 310
Crystal structure analysis — Okaya, **7,** 3/4, 322
Retrieval of geometrically structured information — Jacobsen, **7,** 3/4, 331
Analysis and display of physics data — McGee, **7,** 3/4, 342
Neutron cross-section evaluation — Creasy, **7,** 3/4, 355
Cam design on a graphics console — Lafuente, **7,** 3/4, 365

Implementation and usage — Day, **7,** 3/4, 373
Interactive flight program simulator — Jacobs, **9,** 2, 145
Interactive aeronautical charting — Luetje, **9,** 3, 219

LANGUAGES

Macro language design for System/360 — Freeman, **5,** 2, 62
Graphics subroutine package for FORTRAN — Rully, **7,** 3/4, 248
DISPLAYTRAN for conversational graphics — Gagliano, **7,** 3/4, 281
A language for three-dimensional geometry — Comba, **7,** 3/4, 292
Problem formulation using APL — Kolsky, **8,** 3, 204
Code-generation for large-language compilers — Elson, **9,** 3, 167
Automatic generation of test cases — Hanford, **9,** 4, 242

MANUFACTURING PLANNING AND CONTROL

An economic lot-sizing technique
- The part-period algorithm (PPA) — DeMatteis, **7,** 1, 30
- Mathematical analysis of PPA — Mendoza, **7,** 1, 39
- Multi-item economic lot-sizing — Pierce, **7,** 1, 47

Determining economic sampling plans — Stacy, **8,** 3, 220

MATHEMATICAL METHODS AND PROGRAMS

Computation of e^x with large tables — Spielberg, **5,** 2, 102
Statistical analysis of series of events — Lewis, **5,** 4, 202
Merge-sort analysis by matrix techniques — Radke, **5,** 4, 226
Kernel analysis of differential equations — Hahn, **5,** 4, 248
Calculation of critical paths for large networks — Montalbano, **6,** 3, 163
Coding for error control — Tang, **8,** 1, 48
Pseudo-random number generator for System/360 — Lewis, **8,** 2, 136
Internal sorting with minimal comparing — Woodrum, **8,** 3, 189
Determining economic sampling plans — Stacy, **8,** 3, 220
A model of floating buffering — Woodrum, **9,** 2, 118
Compiler assignment of data items to registers — Day, **9,** 4, 281

MULTIPROCESSING SYSTEMS

Application-oriented multiprocessing system (the 9020)
- Introduction — Keeley, **6,** 2, 78
- Design characteristics — Blakeney, **6,** 2, 80
- Control program — Devereaux, **6,** 2, 95
- Error analysis program — Lancto, **6,** 2, 103
- Diagnostic monitor — Suda, **6,** 2, 116
- Intended application programs — Seward, **6,** 2, 124

OPERATING SYSTEMS

Functional structure of OS/360
- Introductory survey — Mealy, **5,** 1, 3
- Job and task management — Witt, **5,** 1, 12
- Data management — Clark, **5,** 1, 30

Macro language design for System/360 — Freeman, **5,** 2, 62
DOS/360 and TOS/360
- Function and design — Bender, **6,** 1, 2
- Data management concepts — Cenfetelli, **6,** 1, 22
- Internal data management for DOS/360 — Ricour, **6,** 1, 38

Gemini real-time operating system — Mueller, **6,** 3, 150
Avoiding deadlock in multitasking systems — Havender, **7,** 1, 74
Statistics gathering and simulation for Apollo — Stanley, **7,** 2, 85
Conversational job control — Brown, **7,** 3/4, 271
Auxiliary processing system for array calculations — Ruggiero, **8,** 2, 118
On-line inquiry under small operating system — Darga, **9,** 1, 2
A heuristic approach to task dispatching — Ryder, **9,** 3, 189
A virtual machine time-sharing system — Meyer, **9,** 3, 199

XUM

PROGRAMMING NOTATION AND DOCUMENTATION

Microprogram control in System/360 — Tucker, **6,** 4, 222
Automatic generation of test cases — Hanford, **9,** 4, 242

QUEUING

Queuing model for time sharing — Chang, **5,** 2, 115
Message turnaround time — Hauth, **7,** 2, 103
Single-server queuing in computing systems — Chang, **9,** 1, 36

REAL-TIME SYSTEMS AND ANALYSIS

Queuing model for time sharing — Chang, **5,** 2, 115
Real-time systems in perspective — Aron, **6,** 1, 49
Application-oriented multiprocessing system (the 9020)
- Introduction — Keeley, **6,** 2, 78
- Design characteristics — Blakeney, **6,** 2, 80
- Control program — Devereaux, **6,** 2, 95
- Error analysis program — Lancto, **6,** 2, 103
- Diagnostic monitor — Suda, **6,** 2, 116
- Intended application programs — Seward, **6,** 2, 124

Gemini real-time operating system — Mueller, **6,** 3, 150
Statistics gathering and simulation for Apollo — Stanley, **7,** 2, 85
Time-sharing scheduler strategies — Hellerman, **8,** 2, 94
Trajectory control programs — Quarles, **9,** 1, 12

SIMULATION

Role of digital simulation in teleprocessing — Seaman, **5,** 3, 175
Two continuous modeling programs — Brennan, **6,** 4, 242
GPSS/360—Improved general purpose simulator — Gould, **8,** 1, 16
Three-value design verification system — Jephson, **8,** 3, 178
Simulating operating systems — Seaman, **8,** 4, 264
Trace-driven system modeling — Cheng, **8,** 4, 280
Interactive flight program simulator — Jacobs, **9,** 2, 145

SORTING AND MERGING

Merge-sort analysis by matrix techniques — Radke, **5,** 4, 226
Internal sorting with minimal comparing — Woodrum, **8,** 3, 189
A model of floating buffering — Woodrum, **9,** 2, 118

STATISTICAL METHODS AND PROGRAMS

Statistical analysis of series of events — Lewis, **5,** 4, 202
Pseudo-random number generator for System/360 — Lewis, **8,** 2, 136
A model of floating buffering — Woodrum, **9,** 2, 118

STORAGE SYSTEMS

Replacement algorithms for virtual storage — Belady, **5,** 2, 78
Analysis of auxiliary storage activity — Seaman, **5,** 3, 158
Structural aspects of System/360 Model 85
- General organization — Conti, **7,** 1, 2
- The cache — Liptay, **7,** 1, 15

Time-sharing scheduler strategies — Hellerman, **8,** 2, 94
Evaluation techniques for storage hierarchies — Mattson, **9,** 2, 78
A virtual machine time-sharing system — Meyer, **9,** 3, 199

SYSTEM DESIGN AND EVALUATION

Merge-sort analysis by matrix techniques — Radke, **5,** 4, 226
Kernel analysis of differential equations — Hahn, **5,** 4, 248

Redundancy in a parallel algorithm	Shedler, **6,** 3, 142
Coding for error control	Tang, **8,** 1, 48
Time-sharing scheduler strategies	Hellerman, **8,** 2, 94
Three-value design verification system	Jephson, **8,** 3, 178
A perspective on system evaluation	Drummond, **8,** 4, 252
Simulating operating systems	Seaman, **8,** 4, 264
Trace-driven modeling	Cheng, **8,** 4, 280
Using monitor output	Bonner, **8,** 4, 290
Measurement of operational statistics	Stanley, **8,** 4, 299
A synthetic job for measuring system performance	Buchholz, **8,** 4, 309
Effects of storage contention	Skinner, **8,** 4, 319
Evaluation techniques for storage hierarchies	Mattson, **9,** 2, 78

TELEPROCESSING

Teleprocessing system design	
Characteristic problems	Margopoulos, **5,** 3, 134
Approximating optimal network	Esau, **5,** 3, 142
Analysis of request-queued buffer pool	Bricault, **5,** 3, 148
Analysis of auxiliary storage activity	Seaman, **5,** 3, 158
Estimating channel interference	Gay, **5,** 3, 171
Role of digital simulation	Seaman, **5,** 3, 175
Conventions for data communication	Eisenbies, **6,** 4, 267
Message turnaround time	Hauth, **7,** 2, 103
Teleprocessing using standard equipment	Wade, **8,** 1, 23
